

## Eurotech Signs Distribution Agreement with Mouser Electronics

Amaro (Italy) – August 7th, 2014 – Eurotech, a leading supplier of embedded technologies, products and systems, today announced they have signed a distribution agreement with Mouser Electronics, a worldwide distributor of semiconductors and electronic components. Under the terms of the agreement, Mouser Electronics will promote and resell Eurotech’s portfolio of products to their customers including embedded boards and modules, M2M devices and systems, and M2M software and tools to enable the Internet of Things.

“Mouser specializes in new product introduction, giving designers, developers, engineers and buyers a place to find the latest in electronic technologies to help them develop next generation projects,” said Hilary Tomasson, Vice President of Marketing for Eurotech North America. “The distribution agreement with Mouser will give us visibility to people on the front end of the design process as they look for solutions to enable the Internet of Things.”

“Selection, speed and accuracy are at the core of our operations, and distributing Eurotech products will allow us to offer more industry-leading solutions in our portfolio,” said Jeff Newell, Sr. Vice President of Products, Mouser Electronics. “Our customers are looking for new technologies to simplify new product introduction and connect to the Internet of Things, and Eurotech is known for M2M solutions that speed time to market.”

Mouser offers customers 20 global support locations and stocks the world’s widest selection of the latest semiconductors and electronic components for the newest design projects. Mouser Electronics’ website is updated daily and searches more than 8 million products to locate over 2 million orderable part numbers available for easy online purchase with no required minimum order.

### About Eurotech

Eurotech (ETH:IM) is a global company that integrates hardware, software, services and expertise to deliver embedded computing platforms and sub-systems to leading OEMs, system integrators and enterprise customers for successful and efficient deployment of their products and services. Drawing on concepts of minimalist computing, Eurotech lowers power draw, minimizes physical size and reduces coding complexity

to bring sensors, embedded platforms, sub-systems, ready-to-use devices and high performance computers to market, specializing in defense, transportation, industrial and medical segments. By combining domain expertise in wireless connectivity as well as communications protocols, Eurotech architects platforms that simplify data capture, processing and transfer over unified communications networks.
