

New AWDFlash Version for SBC-GX1

Issue Date:	03. April. 06	Circulation:	General
PCB Version:	N/A	Schematic Version:	N/A
PCB Issue:		Schematic Issue:	

The SBC-GX1 Macronix MX29F002TQC-70 BIOS flash device is now end-of-life. We have chosen to replace this with a Spansion AM29F002BT-70JD.

Problem summary

Version 7.97A of AWD Flash currently provided on the GX1 support CD does not support this device. Many customers are presently using this version to configure their GX1 product in the field.

Problem solution

AWD Flash ver 8.24B is available on the Arcom website:

http://download.arcom.com/support/DOS/GX1/AWDFLASH_v8i24B.zip

The GX1 support CD will be updated to include this utility in due course.

Note: The BIOS utility FLASHROM.EXE used to update the General Software BIOS that is also used on the SBC-GX1 already supports the new flash device.
