Eurotech: Parvus Receives $1 Million Order for Rugged IP Routers in Support of Missile Defense Program

Parvus DuraMAR router provides air defense system with IP network connectivity using Cisco mobile router technology in MIL-STD qualified design

Amaro (Italy) **–** April 24th, 2012 **–** Eurotech subsidiary Parvus announces it has received a $1 Million (USD) order for DuraMAR mobile routers in support of a US Department of Defense (DoD) missile defense program. These rugged Commercial Off the Shelf (COTS) networking subsystems are being integrated by a DoD prime contractor into a mobile air defense platform being upgraded with IP network connectivity. Due to non-disclosure agreements, no further details about the customer can be provided. Deliveries will take place this year.

This order builds on a history of Parvus supplying rugged network routers / switches to major missile defense programs. Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) technology refresh and **insertion programs routinely specify Parvus' DuraMAR** networking appliances for situational awareness and network centric operations due to their robust MIL-STD qualified designs, and the Information Assurance (IA) certifications and software capabilities of the Cisco IOS® software. They are designed for use in airborne, ground, manned or unmanned vehicle applications with compliance to extreme environmental conditions.

About Parvus
Parvus Corporation is a leading supplier of rugged COTS computing and IP networking subsystems for Size, Weight, and Power (SWaP) constrained military, aerospace, and homeland defense applications. **Parvus' tactical mission processors, network routers, Ethernet switches and embedded board**-level products provide highly reliable command, control, computing and communication (C4) capabilities for situational awareness and mobile data processing in airborne, ground vehicle, and naval installations. For more information, visit www.parvus.com.

About Eurotech

Eurotech (ETH.MI) is a global company that integrates hardware, software, services and expertise to deliver embedded computing platforms and sub-systems to leading OEMs, system integrators and enterprise customers for successful and efficient deployment of their products and services. Drawing on concepts of minimalist computing, Eurotech lowers power draw, minimizes physical size and reduces coding complexity to bring sensors, embedded platforms, sub-systems, ready-to-use devices and high performance computers to market, specializing in defense, transportation, industrial and medical segments. By combining domain expertise in wireless connectivity as well as communications protocols, Eurotech architects platforms that simplify data capture, processing and transfer over unified communications networks. Our customers rely on us to simplify their access to state-of-art embedded technologies so they can focus on their core competencies. Learn more about Eurotech at www.eurotech.com.
