

Eurotech: \$6.0M Contract from Wenco International Mining Systems Ltd., a Hitachi Construction Machinery Co., Ltd. Subsidiary

Wenco Selects Rugged Eurotech DynaCOR to Power Asset Management System for Mining and Construction Equipment

Amaro (Italy) – November 12, 2012 – Eurotech, a leading supplier of embedded technologies, products and systems, today announces they have received a contract from Wenco International Mining Systems Ltd., a subsidiary of Hitachi Construction Machinery Co., Ltd., for a total estimated value of \$6.0M USD in a two-year period to supply the Eurotech DynaCOR rugged mobile computer platform for a power asset management system. Deliveries will launch in 2013.

“Eurotech provided strong support through the proposal process, and ultimately we chose the DynaCOR because it was rugged and provided the capabilities we need to reliably connect heavy construction equipment to our asset management system,” said Phil Walshe, CEO of Wenco.

The DynaCOR 10-00 is a rugged mobile computer platform that targets demanding vehicle and industrial installations such as those in heavy construction machinery. With a compact yet rugged design and integration, the system withstands the mechanical and temperature stresses encountered in harsh environments while providing an exceptional set of communication options needed in diverse use cases.

“The DynaCOR will help Wenco’s clients realize operational savings, since connecting heavy equipment to the asset management system will allow them to perform predictive maintenance,” said Greg Nicoloso, CEO of Eurotech, North America. “The mining industry increasingly demands 24/7 operation from heavy equipment, so a rugged DynaCOR mobile computer will allow Wenco to improve their client’s productivity and efficiency by keeping vehicles in operation as much as possible.”

About Eurotech

Eurotech (ETH:MI) is a global company that integrates hardware, software, services and expertise to deliver embedded computing platforms and sub-systems to leading OEMs, system integrators and enterprise customers for successful and efficient deployment of their products and services. Drawing on concepts of minimalist computing, Eurotech lowers power draw, minimizes physical size and reduces

coding complexity to bring sensors, embedded platforms, sub-systems, ready-to-use devices and high performance computers to market, specializing in defense, transportation, industrial and medical segments. By combining domain expertise in wireless connectivity as well as communications protocols, Eurotech architects platforms that simplify data capture, processing and transfer over unified communications networks. Our customers rely on us to simplify their access to state-of-art embedded technologies so they can focus on their core competencies. Learn more about Eurotech at www.eurotech.com.

About Wenco International Mining Systems Ltd.

With over 25 years experience in the industry Wenco advances the efficiency and safety of equipment in open pit mining. From equipment monitoring applications to automatic dispatch, health management and **precision positioning and guidance of machines our systems are used worldwide by the industry's top** companies for improvements in productivity, equipment availability, utilization, and operational safety.

About Hitachi Construction Machinery Co., Ltd.

Hitachi Construction Machinery Co., Ltd. (HCM) and its consolidated subsidiaries (the HCM Group) use extensive experience and advanced technological capabilities to develop and manufacture a wide range of leading-edge mining machinery. The current range of Hitachi hydraulic mining shovels/backhoes and Hitachi mining rigid frame dump trucks have been backed by Hitachi's most dynamic and responsive service and support network worldwide.
