

## Eurotech Receives 1.2M Euro Order for Railway Application

Amaro (Italy) – January 28, 2013 – Eurotech, a leading supplier of embedded technologies, products and systems, today announces they have received an order for 1.2M Euro to supply on-board equipment for railway application to Alstom Italy. Deliveries will take place over a period of two to three years.

“Eurotech has a long tradition in providing embedded platforms for railway applications”, said Domenico Bondi, Sales Director for Central and Southern Europe. “Our expertise in mobile devices for harsh environments makes our offering an excellent fit in the transportation **vertical market**.”

### About Eurotech

Eurotech (ETH.MI) is a global company that integrates hardware, software, services and expertise to deliver embedded computing platforms and sub-systems to leading OEMs, system integrators and enterprise customers for successful and efficient deployment of their products and services. Drawing on concepts of minimalist computing, Eurotech lowers power draw, minimizes physical size and reduces coding complexity to bring sensors, embedded platforms, sub-systems, ready-to-use devices and high performance computers to market, specializing in defense, transportation, industrial and medical segments. By combining domain expertise in wireless connectivity as well as communications protocols, Eurotech architects platforms that simplify data capture, processing and transfer over unified communications networks. Our customers rely on us to simplify their access to state-of-art embedded technologies so they can focus on their core competencies.
