

Eurotech enables the greenest supercomputer in the world

Cutting edge liquid cooling & GPU accelerator enable Italy's Top Supercomputing Center to Leapfrog Current Green 500 No. 1 system

Amaro (Italy) – January 29, 2013. Eurotech, a leading provider of embedded and supercomputing technologies, will present tomorrow the installation in CINECA of the Eurora supercomputer, which ranks as the **world's** most energy efficient high-performance computing system based on measurements taken following the Green500 guidelines.

Eurora serves as the base technology for the development of the PRACE 2IP co-funded prototype, a project with **the same name "Eurora" led by the CINECA supercomputing center** in Italy. CINECA will deploy the Eurora prototype to advance research and discovery in the fields of computational sciences, including fundamental constituents of matter, condensed matter, astrophysics, the life sciences, and Earth sciences.

The Eurora supercomputer is accelerated by NVIDIA® Tesla® K20 GPU accelerators based on NVIDIA **Kepler™**. Eurora provides the base for the commercial Eurotech Aurora Tigon, expanding the Eurotech Aurora supercomputer product line to include new energy-efficient, high-performance GPU-accelerated systems.

About Eurotech

Eurotech (ETH.MI) is a global company based in Italy and with subsidiaries in Europe, North America and Asia. The Eurotech Group develops and markets miniaturized computers for special uses (NanoPCs) and computers featuring high computing capacity (HPCs – High Performance Computers). With these two product categories Eurotech aims to become a leader in the implementation of the pervasive computing scenario which, by exploiting the Cloud IT infrastructure, is capable of enabling an entire range of value-added activities and services in the transport, logistics, security, industrial and medical sectors.
