

Eurotech announces its Partnership with InVMA Limited, a dedicated and experienced IoT & M2M company building out IoT applications on field proven platforms

Amaro (Italy) – February 2nd, 2015 – Eurotech, a leading supplier of embedded technologies, products and IoT / M2M systems, announced its Partnership with InVMA Limited a leading supplier of IoT and M2M Solutions and Applications. Working in partnership gives both Eurotech and InVMA the capability and experience to provide customers with an end to end IoT / M2M solution, from sensors through intelligent gateways to Eurotech's EC (Everyware Cloud) and onto highly flexible applications for any industry sector. Eurotech and InVMA are strongly committed to M2M/IoT and work together to condense the complexity of the operational technologies into a cost-effective, rapidly deployed, simple to use and powerful software framework, integration platform and end user applications.

About InVMA

InVMA develops end to end hardware and software solutions that bring together people, systems and connected equipment ("things") to improve the way organisations work. These solutions provide bi-directional communication between connected devices, sensors, assets, client systems and processes to facilitate the creation of new revenue streams, enhance customer satisfaction and improve operational efficiency. InVMA deliver these innovative solutions with a modern and complete platform for M2M and the Internet of Things:

- Built with modern technology, so its Social, Mobile, Mashable, Searchable
- Complete development and runtime environment for building sophisticated IoT and M2M applications
- Includes all necessary functionality required to get a solution to market quickly

Customers benefit from the ability to deploy a complete end to end IoT / M2M platform and application suite that can be applied to any IoT / M2M project in the shortest possible timeframe. This is achieved by working with Eurotech's IoT/M2M portfolio including intelligent gateways running the recently released ESF 3.0 (Everyware Software Framework) connecting to EC platform and development of the supporting application layers.

About Eurotech

Eurotech (ETH:IM) is a global company that integrates hardware, software, services and expertise to deliver embedded computing platforms, M2M integration platforms and IoT enabling solutions to leading OEMs, system integrators and enterprise customers for successful and efficient deployment of their products and services. Drawing on concepts of minimalist computing, Eurotech lowers power draw, minimizes physical size and reduces coding complexity to bring embedded platforms, sub-systems and ready-to-use devices to market, specializing in transportation, industrial, security, logistics and medical segments. By combining domain expertise in wireless connectivity as well as communications protocols, Eurotech architects

platforms that simplify data capture, processing and transfer over unified communications networks. Learn more about Eurotech at www.eurotech.com.
