Eurotech Receives 2015 IoT Evolution Product of the Year Award

ReliaCELL 10-20 Honored for Exceptional Innovation

Amaro, ITALY – May 28th, 2015 – Eurotech, a leading supplier of embedded technologies, products and systems, announced today that their rugged mountable cellular adapter ReliaCELL 10-20 has received a 2015 IoT Evolution Product of the Year Award from IoT Evolution magazine, the leading publication covering IoT technologies.

Enabling cellular technology in international projects is one of the toughest and most time-consuming challenges enterprise customers face. Eurotech's ReliaCELL 10-20 is a rugged cellular modem that simplifies solution deployment, cuts time-to-market and reduces certification costs associated with implementing a cellular solution. ReliaCELL easily extends existing or new applications sealing onto the surface of an enclosure with a standard USB connection and SMA connectors for antennas. The sealed IP67 rated modem is designed to integrate with Internet of Things (IoT), M2M, industrial computing and enterprise appliances for fast and highly reliable cellular connectivity.

"Now customers save time and money while avoiding the cost, hassle and delay of certifying with many cellular carriers, since Eurotech has already taken care of the certification process," said Robert Andres, Chief Marketing Officer, Eurotech. "ReliaCELL products are available in certified versions for many cellular carriers in different geographic regions, including the Americas, Europe and Asia. They are providing the flexibility to adapt, should our customers product roadmap or application requirements evolve, from a geographic perspective but also from 2G to 3G to 4G."

For more information about Eurotech's pre-certified cellular solution ReliaCELL, please read the [full press release announcing this product](#).

"The solutions selected for the IoT Evolution Product of the Year Award reflect the diverse range of innovation driving the machine to machine market today. It is my honor to congratulate Eurotech for their innovative work and superior contribution to the rapidly evolving IoT industry," said Carl Ford, CEO of Crossfire Media, a co-publisher of IoT Evolution Magazine.

"It is my pleasure to recognize ReliaCELL, an innovative solution that earned Eurotech the 2015 IoT Evolution Product of the Year Award," said Rich Tehrani, CEO, TMC. "I look forward to seeing more innovation from Eurotech in the future."

The winners of the 2015 IoT Evolution Product of the Year Award will be published in the second quarter edition of IoT Evolution magazine.

About Eurotech

Eurotech is a listed global company (ETH:IM) that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech solutions in place, clients have access to the latest open source and standardized software stacks, flexible and rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class building blocks, including device and data management, connectivity and communication platform, intelligent edge devices and smart objects following **business models that fit today's business world.** Learn more about Eurotech at www.eurotech.com.
