

## Eurotech wins the Best Application of IoT Award at the IDTechEx Show in Santa Clara, California

*Eurotech had been nominated for the Best Application of IoT by Red Hat*

Amaro, ITALY – November 19th, 2015 – Eurotech, a leading provider of embedded systems, Machine-to-Machine (M2M) platforms and Internet of Things (IoT) solutions, today announced that it has received from IDTechEX the award for the best application of IoT thanks to the excellence of the application provided to Ariston Thermo Group.

Since 1999 IDTechEx is a leader in independent market research, business intelligence and events on emerging technology, and supports clients in making essential strategic decisions in over 80 countries. The award was presented to the entrant who has successfully used IoT technology to solve a real problem and generate significant value for the user.

The award from IDTechEx is a recognition of the innovation, the completeness and the value generated by the solution offered by Eurotech to Ariston Thermo Group, which includes the software platform ESF, Everywhere Cloud and a set of web and mobile applications that allow the real time connection among the appliances installed, which are geographically distributed, and all the stakeholders involved in the process.

The benefits of the solution proposed by Eurotech – as per the motivation presented by Red Hat – relate to three different types of users:

- for the end customer , the ability to remotely control their appliances and receive alerts and notifications from them in real time
- for operators providing the technical support, the ability to diagnose and reconfigure appliances, hence providing a high level of preventive maintenance and avoiding blockages and annoying failures of the equipment
- for Ariston Thermo Group, an effective and efficient implementation of marketing policies and strategic investments in the design and development of new generations of products.
