Description

The A6pci8080 is a dual-slot 6U CompactPCI CPU board designed to meet the requirements of industrial and rugged fanless applications.

Fully compliant with the PICMG 2.0 CompactPCI standard, the A6pci8080 is based on the 6th Generation Intel Core and Celeron processor family, supporting up to 32GB DDR4 RAM on dual SO-DIMM socket.

Other features include high speed interfaces on the front panel: four Gigabit Ethernet, four USB 3.0 and two serial ports on DB9 connectors, and one DVI-I that supports both analog and digital video signals. In addition to these interfaces, the A6pci8080 supports two USB 2.0 and one SATA connector on internal headers, and a M.2 slot for additional on-board storage.

Supported operating systems include Windows 10 IoT Enterprise.

Professional Services are available for the A6pci8080, starting from BIOS personalization and including full system development and production. Deep board customization, such as feature changes, are also available.
