- **Professional Services**

Features

Virtualization - Official compatibility with VMware vSphere for seamless integration in a software-defined hyperconverged IT infrastructure

Fanless EN50155 - Fanless, vent-free enclosure, certified for EN50155 (Rolling Stock) in the TX temperature class (up to +85°C) with an S2 power supply, suitable for any heavy-duty application

Compact Form Factor - 19" 1U rack-mount with short-depth form factor to fit in most space-constrained deployments

Resilient Performance - Supports intensive computation of data, network and storage-oriented workloads, with a truly embedded, server-class CPU

Long-term Availability - Designed for markets and use cases where long-term availability and support is a must have requirement

Professional Services - The modular design allows further customization through Eurotech Professional Services, including the integration of user selected accelerators, storage and networking modules

Description

The BoltCOR 30-17 Virtualization Edition (VE) is a rugged Edge server that bridges IT and OT at the Edge by delivering highly efficient virtualization even in harsh operating conditions.

The BoltCOR 30-17 VE is officially listed in the VMware Hardware Compatibility List (HCL) and is extremely rugged, with no fans nor vents, to ensure reliable operation even under EN50155 TX temperature conditions (up to +85°C) while delivering the same benefits of a typical virtualized Data Center to the Field.

With 24GB of DDR4 ECC RAM, a soldered down Pentium D1519 CPU, dual high reliability 512GB SSDs and an EN50155 S2 class power supply, the BoltCOR 30-17 VE is extremely resilient; truly embedded components, conformal coating, a vent-free design and a sturdy build add extra protection to a compact, 295mm deep, 1U rack-mount chassis.

The BoltCOR 30-17 VE features Wi-Fi, Bluetooth and dual GbE interfaces. Factory customization options include internal global cellular modems, up to three modem configurations, and GPS with Untethered Dead Reckoning.

The BoltCOR 30-17 VE offers long term availability and support programs that ensure continuity of supply and customer service

Eurotech Professional Services allow for further personalization, including validation and integration of user-selected expansion modules, with a choice of power supply, memory, storage and I/O subsystems options.
