

Eurotech Adds Predixion Software to IoT Partner Ecosystem to Support Customer Deployments

Amaro, Italy, July 6th, 2016 – Eurotech, a leading provider of smart devices and Machine-to-Machine (M2M) technologies enabling Internet of Things (IoT) applications, today announced they have signed a joint marketing agreement with Predixion Software, a real-time visual edge analytics software company for the IoT. The partnership enables Eurotech and Predixion to work together to give customers end-to-end hardware and software support to get their IoT applications to market quickly.

“We give customers access to a rich ecosystem of partners that help meet their needs for smart IoT solutions,” said Jason Walton, Manager, IoT Solutions and Services at Eurotech in North America. “By working closely with companies like Predixion, our customers can select the right partners to deliver all the building blocks, wrapped up into a full solution, required to create IoT services and applications.”

Eurotech customers who need to visualize their data can leverage Predixion RIOT, a real-time visual edge analytics software that can reside on top of the Everyware Software Framework and display information coming from the Everyware Cloud. Predixion can also help customers write custom data analytics applications.

“Eurotech hardware and software helps customers capture valuable data at the edge, and Predixion helps them securely harness the power of that IoT data with analytics solutions,” said Chad Boulanger, VP of Business Development, Predixion. “Working together we can help companies deploy IoT solutions seamlessly and take advantage of valuable data immediately.”

About Predixion Software

Predixion Software is a real-time edge analytics software company based in Orange County, California. Predixion was founded on the belief that analytics has the power to create a smarter, safer and healthier world. To achieve this vision, Predixion developed Predixion RIOT™, an edge-based analytics platform that provides real-time, advanced analytics on devices, gateways and routers to leverage real-time data at the edge of the network. Unlike many “Big Data” solutions which drop IoT data into a Data Lake and perform cloud analytics on data from the edge, Predixion RIOT solutions provide IoT analytics directly at the edge, thus providing immediate insight. At Predixion, we make *Things* smarter.™ For more information, visit www.predixionsoftware.com.

About Eurotech

Eurotech (ETH:IM) is a global company that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech

solutions in place, clients have access to the latest open source and standardized software stacks, flexible and rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class building blocks, including device and data management, connectivity and communication platform, intelligent edge devices and smart objects following business models that fit today's business world.
