

Eurotech: **Everyware Cloud used as enabling technology for Zoppas Industries'** IoT solution CONNETTENDO.

Eurotech's device & data management technology powers CONNETTENDO, Zoppas Industries' new IoT solution enabling B2B enterprises to generate revenues from IoT service businesses

Amaro, ITALY – March 09th, 2016 – Eurotech, a leading provider of Machine-to-Machine (M2M) technologies enabling Internet of Things (IoT) applications, today announced that Zoppas Industries, an industry-leading supplier of heating element technologies, choose Eurotech's Everyware Cloud as the device & data management platform for CONNETTENDO, their new IoT solution designed to enable B2B enterprises to connect, control and generate revenues from IoT service businesses.

CONNETTENDO is an end-to-end solution for a number of vertical industrial and commercial applications. It provides device connectivity, cloud platform, data intelligence and mobile apps requiring a minimum setup and limited cost to deliver custom advanced features for specific purpose IoT implementations. The solution is designed to offer manufacturers a modular, secure, scalable and reliable platform to connect to their products and support the personalization of sales and service processes.

CONNETTENDO is the result of a joint development between Zoppas Industries and the technology partners Eurotech and Sysdata to accelerate innovation and digital transformation across industries.

Zoppas Industries is announcing the launch of its new IoT solution CONNETTENDO today, and will be exhibiting it at MCE 2016 international Expo ("That's Smart" area for "home & building automation") being held March 15 to 18 in Milan with a special demo for its HVAC customers.

About Eurotech

Eurotech (ETH:IM) is a global company that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech solutions in place, clients have access to the latest open source and standardized software stacks, flexible and

rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class building blocks, including device and data management, connectivity and communication platform, intelligent edge devices and smart objects following business models that fit today's business world.
