

## **Eurotech to Showcase its Embedded, Rugged HPEC Products Portfolio Including Innovative Industrial IoT and Embedded Platforms at Hannover Messe 2019**

*Visitors will discover the benefits of Industry 4.0 with our live demos involving IoT gateways, edge computers and IoT platforms at Hall 6, Booth G38*

**AMARO (Udine, Italy), April 1<sup>st</sup>, 2019** – Eurotech brings its portfolio of rugged, reliable and cost-effective data and device management solutions at Hannover Messe, the world's leading trade fair for industrial technology: the company will be exhibiting at Hall 6, Booth G38.

Visitors can interact with live demos and learn more about [Everyware IoT](#), Eurotech open, integrated and managed Industrial IoT architecture for edge-to-cloud connectivity. Eurotech will simulate industrial environments employing its [Multi-service IoT Edge Gateways](#) to connect field assets to leading IoT cloud service and platforms like [Everyware Cloud \(EC\)](#) for remote device and data management. The IoT gateways provide native support for industrial protocols to communicate with field devices thanks to [Everyware Software Framework \(ESF\)](#), Eurotech IoT Edge Framework that also provides a web-based development environment to visually compose Industrial IoT applications.

Eurotech also brings the benefits of hyper-converged infrastructures – typical of IT and data-center applications – to the edge. The [BoltCOR 30-17](#) is a powerful EN50155-certified edge server with very high computational and storage capabilities that enable the management of different IoT applications on the same piece of hardware deployed in the field.

Visitors will be amazed by Eurotech [high-performance embedded computing \(HPEC\) systems](#), that are capable of bringing extreme computing, data-logging and storage performance at the edge for artificial intelligence and deep learning applications.

“Events like Hannover Messe allow us to showcase our embedded and IIoT expertise through innovative systems and building blocks for end-to-end solutions, developed in cooperation with our ecosystem of partners” commented Giuseppe Surace, Chief Product & Marketing Officer at Eurotech. “Eurotech edge computers will bring more and more computational capabilities where data is generated – at the edge – to fit the needs of today's IoT applications”.

**About Eurotech**

Eurotech (ETH:IM) is a global company that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech's solutions in place, clients have access to the latest open source and standardized software stacks, flexible and rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class building blocks, including device and data management, connectivity and communication platform, intelligent edge devices and smart objects following business models that fit today's business world.
