

## Eurotech and Alleantia for plug&play Industry 4.0

*Thanks to Alleantia's wide range of plug&play connectors integrated on Eurotech's IoT hardware and software components, the two companies further simplify the integration with industrial machinery*

**Amaro (Italy), May 11<sup>th</sup>, 2021** – Eurotech, a leader supplier of hardware and software components to develop and deploy edge computing and Internet of Things (IoT) solutions, and [Alleantia](#) announced a technology partnership to simplify the edge-to-cloud integration of devices and assets for Industry 4.0 applications.

Eurotech's secured and managed [IoT Edge Gateways](#) provide industrial networking capabilities and allow the secure management of the whole life cycle of edge software thanks to Everyware IoT. The collaboration between the two companies enabled an integrated solution to simplify the connection of any industrial device to on-premise and cloud platforms through an integrated and scalable solution, easy to manage even on large deployments.

“We are proud to start this collaboration with Eurotech, a partnership between two Italian leaders in the Industry 4.0 sector. The solution provide the highest levels of security and manageability with minimum impact on implementation costs. It's a unique and very competitive solution that employs the integration of Alleantia's plug&play connectors with Eurotech Everyware IoT hardware and software components in a secure and managed infrastructure” said Stefano Linari, Alleantia founder and CEO.

“One of the hardest challenges of IoT development is the seamless integration of OT technologies with IT applications. Eurotech has always committed towards a partner ecosystem at the edge and cloud level as a catalyst for innovation, allowing simpler Industry 4.0 application development” commented Giuseppe Surace, Eurotech CP&MO. “With Alleantia on board we provide system integrators and final customers a wide range of plug&play technologies and best-in-class security features to connect machinery and assets to reach the highest levels of efficiency in production processes”.

### About Eurotech

Eurotech (ETH:IM) is a multinational company that designs, develops and supplies Edge Computers and Internet of Things (IoT) solutions – complete with services, software and hardware – to system integrators and enterprises. By adopting Eurotech solutions, customers have access to IoT building blocks and software platforms, to Edge Gateway to enable asset monitoring and to High Performance Edge Computers (HPEC) conceived also for Artificial Intelligence (AI) applications. To offer increasingly complete solutions,

Eurotech has activated partnerships with leading companies in their field of action, thus creating a global ecosystem that allows it to create "best in class" solutions for the Industrial Internet of Things. [Learn more](#)

### **About Alleantia**

Founded in 2011, Alleantia is a leader for its plug & play software solutions applied to the Industrial Internet of Things (IIoT). Alleantia's plug & play IoT technology is the beating heart of the digital transformation of every industrial business. Conceived and built to offer simplicity, scalability, reliability and speed of implementation, Alleantia allows each company to achieve maximum efficiency, thanks to a complete convergence between OT and IT, a wide ecosystem of certified partners (application developers, system integrators, cloud platforms) and works in partnership with the main global players in the IT world. A platform that allows complete IoT integration with a plug & play connection of any industrial device or production line, machine tool, industrial plant, with any on-premise or in-cloud IT infrastructure (e.g. Azure IoT Hub from Microsoft or AWS IoT from Amazon or MQTTs), an integrated management of 'Enterprise-grade' software, remote installation and updating of Alleantia software, a proprietary library with 5000 ready-to-use drivers, able to offer high performance in data acquisition and in their management, interpretation and distribution, IT security, with technical support and experience recognized in Italy and abroad.
