Eurotech @ CeBIT 2017

AMARO (Italy), January 23, 2017 – After the great success in the previous years, Eurotech confirmed and extended its participation with regards to CeBIT 2017 (March 20-24), presenting their integrated portfolio of hardware and software solutions for M2M/IoT applications, enabling end users as well as system integrators to cut time-to-market and deploy scalable, flexible and affordable IoT projects.

As a global leader in securely connecting distributed devices that make up the Internet of Things, Eurotech collaborates with customers, partners and integrators to bring rugged, reliable and cost effective data and device management solutions to market. Eurotech's offering includes IoT gateway hardware, firmware, operating systems, M2M/IoT device middleware and device cloud services that are the basic building blocks for IoT infrastructures that drive business success.

Eurotech is part of a strong ecosystem that delivers end-to-end IoT solutions to many vertical markets, combining open and industry standards, proven technology and the collective experience of the ecosystem partners. This is demonstrated visibly in the M2M / IoT Pavilion at CeBIT where Eurotech with several partners will highlight the important roles Open Source, Java and OSGi are playing in IoT solutions deployed today. Also the joint work with Red Hat on a complete, end-to-end, enterprise-ready open source based IoT architecture will be addressed, while other partners demonstrate specific domain expertise like for example cellular connectivity solutions (KORE Wireless) and IT/OT integration (Red Hat).

In addition Eurotech and its partners show powerful integrated vertical solutions including field service management & analytics (Oneserve), industrial PLC integration, smart energy, connected heaters & boilers, people counting in public transportation and smart city / environmental monitoring.

As part of the participation, a keynote will be held by Eurotech CEO, Roberto Siagri, pointing out how business transformation through data leveraging an open IoT Architecture approach is unlocking the power of IoT for enterprises.

Powerful M2M / IoT Architecture & Solutions – open, secure and available today!

About Eurotech
Eurotech (ETH:IM) is a global company that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech s solutions in place, clients have access to the latest open source and standardized software stacks, flexible and rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class building blocks, including

device and data management, connectivity and communication platform, intelligent edge devices and smart objects following business models that fit today's business world. Learn more about Eurotech at www.eurotech.com.
