Eurotech and e-Lios Partner Up for a Coffee 4.0

AMARO (Italy), 17th April 2018 – Eurotech, a long-time leading provider of embedded systems and a global leader in Internet of Things (IoT) enablement, announced today a technical partnership with e-Lios s.r.l. - a company based in Camerino (Macerata, Italy) specialized in software development for small and medium-sized businesses – for a draft study on interconnection and remote control of coffee machines.

The partnership has begun within an innovative project involving Simonelli Group S.p.A., a company based in the Marche region which exports coffee machines worldwide. Eurotech IoT Edge Gateway family (ReliaGATE) and e-Lios customized software allowed Simonelli Group to gather data transmitted from globally-deployed coffee machines and process to them in a 4.0 perspective.

IoT Edge Gateways collect and process data related to pressure, temperature and coffee supply and send them to the e-Lios software, which analyze data-related stats and turn them into valuable information to ensure flawless machine operations. The goal is to remotely monitor every significant parameter to improve performances and consumptions and to ensure quality assistance.

"For a long time Eurotech has been spreading the notion of *ecosystem*" commented Giuseppe Surace, Eurotech CP&MO "and as an evidence of this approach, the collaboration with specialized partners like e-Lios allow the development and deployment of IoT architecture in any application".

"The synergy between e-Lios software and Eurotech platform and devices has turned out to be a winning approach and enabled a high-end telemetry control system for coffee machines" said Francesco Maccari, Business Unit Manager for Industry 4.0 at e-Lios. "The solution can be applied to many other use cases. Our software is scalable and highly customizable and can integrate to a broad range of Eurotech systems, suitable for any kind of project", he concluded.

About Eurotech

Eurotech (ETH:IM) is a global company that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech s solutions in place, clients have access to the latest open source and standardized software stacks, flexible and rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class

building blocks, including device and data management, connectivity and communication platform, intelligent edge devices and smart objects following business models that fit today's business world. Learn more about Eurotech at www.eurotech.com.

About e-Lios

Founded in 2007 as a spin-off of the University of Camerino, today e-Lios s.r.l. is a growing company, active in the field of software development.

Since its foundation, the company has been working on ICT systems, supporting digitization, interconnection and processes optimization for SMEs. These systems evolved in customizable, complete and integrated solutions for production and supply chain support, accordingly to INDUSTRIA 4.0 model.

Other relevant sectors for the company are:

TOURISM - Territorial portals, georeferenced mobile app and augmented reality to enhance innovative artistic and cultural heritage

TRANSPORTS - infomobility software, electronic ticketing, penalties management, AVM and software to transport networks planning;

SMART PA - software solutions to improve organization and processes of all sectors of the PA thought high capacity of integration with heterogeneous software and databases;

WEB AGENCY - personalized web applications, responsive websites and e-commerce, CMS based, with all the latest technological and graphic innovations;

MOBILE APP - custom apps for mobile devices on iOS, Android, Windows mobile, realised to enhance innovative marketing management and remote work.

Constant staff training, attention to software quality and customer satisfaction make e-Lios the ideal partner for companies that believe in innovation as development driving factor.
