

Eurotech Receives Award from Intel® Technology Provider: Smart City Building Solutions Partner of the Year Award

Amaro (Italy) – June 3rd, 2015 – Eurotech, a leading supplier of embedded technologies, products and IoT / M2M systems, announced it was recognized as a winner of the Intel® Technology Provider’s Smart City Building Solutions Partner of the Year Award at the 2015 Intel® Solutions Summit (ISS) North America.

“The market is maturing and we recognize there is an increased need for IoT solutions that speed time to market and help customers focus on their core competencies,” said Hilary Tomasson, VP, Marketing, Eurotech North America. “Recognition in both smart city IoT applications and innovative software shows how much Eurotech has evolved to meet growing market demand by bringing new solutions to dynamic environments.”

Intel Solutions Summit is one of the most prestigious channel events in North America. This invitation-only conference enables top-tier Intel Technology Providers to connect with other channel partners and Intel executives, and receive updates on the latest technologies, market trends and product innovations. Each year, Intel honors its Platinum partners for excellence in various categories.

“IoT solutions can bring tremendous benefit to applications like smart buildings and Eurotech is addressing this opportunity by enabling remote building monitoring as well as energy and waste management,” said Todd Garrigues, Director of North America Partner Marketing, Intel. “For that reason, the Intel® Technology Provider program recognized Eurotech as our Smart City Building Solutions Partner of the Year.”

Eurotech offers a platform for IoT applications, Everyware Cloud, which can be used across many different industries and its specific device and data management capabilities have proven to be particularly useful in smart city applications.

Eurotech also recently collaborated with Intel to develop an IoT Solutions Blueprint, “Connecting Business with Machines in the Cloud-Based World of IoT,” that defines the value of integrated hardware and software for IoT applications.

About Eurotech

Eurotech (ETH:IM) is a global company that designs, creates and delivers full Internet of Things solutions, including services, software and hardware to leading systems integrators and enterprises large and small. With Eurotech solutions in place, clients have access to the latest open source and standardized software stacks, flexible and rugged multi-service gateways and sophisticated sensors to bring actionable data from the field into business operations. Working with world-class ecosystem partners, Eurotech delivers on the promise of the Internet of Things either from end to end, or with best in class building blocks, including device and data management, connectivity and communication platform, intelligent edge devices and smart objects following business models that fit today's business world.
