

Eurotech Earns Partner-level Status in John Deere Achieving Excellence Supplier Program

Amaro (Italy) – January 30th, 2014 – Eurotech, a leading supplier of embedded technologies, products and systems, today announces they have been achieved Partner-level **status**, John Deere’s highest supplier rating, in the John Deere Achieving Excellence program.

The Columbia-based company was selected for the honor in recognition of its dedication to providing products and services of outstanding quality as well as its commitment to continuous improvement.

Suppliers who participate in the Achieving Excellence program are evaluated annually in several key performance categories, including quality, cost management, delivery, technical support and wavelength, which is a measure of responsiveness. John Deere Supply Management created the program in 1991 to provide a supplier evaluation and feedback process that promotes continuous improvement.

“John Deere’s focus on high quality systems, with integrated hardware and software, fits well with Eurotech’s history, expertise and attention in this area, helping us to quickly build a strong working relationship,” said Greg Nicoloso, CEO of Eurotech in North America. “Eurotech products offer the ruggedization required for Deere’s demanding applications, along with multiple communications and multimedia options, for reliable and consistent operation in often harsh conditions.”

About Eurotech

Eurotech (ETH.MI) is a global company that integrates hardware, software, services and expertise to deliver embedded computing platforms and sub-systems to leading OEMs, system integrators and enterprise customers for successful and efficient deployment of their products and services. Drawing on concepts of minimalist computing, Eurotech lowers power draw, minimizes physical size and reduces coding complexity to bring sensors, embedded platforms, sub-systems, ready-to-use devices and high performance computers to market, specializing in defense, transportation, industrial and medical segments. By combining domain expertise in wireless connectivity as well as communications protocols, Eurotech architects platforms that simplify data capture, processing and transfer over unified communications networks.
