EUROTECH

PRESS RELEASE

Eurotech is proud to enter the élite of IEC 62443 certified companies

Our new generation of integrated hardware and software solutions is cybersecure by design and certified according to IEC 62443-4-2, that is the most prominent product cybersecurity international standard

Amaro (Italy), November 25th, 2021 – Eurotech, a trusted and leading enabler of Industrial Internet of Things (IIoT) solutions, is thrilled to announce that its Edge Gateway ReliaGATE 10-14 integrated with the software platform ESF is one of the first products in the world achieving both IEC 62443-4-2 and IEC 62443-4-1 cybersecurity certifications.

Compliance with both the product-related and process-related standards, certified by TÜV Nord, confirms Eurotech's commitment towards a "cybersecurity by design" approach.

"The strength of our premium solution goes beyond intrinsic security of standalone hardware and standalone software, but lies in the integration of the two, providing our customers with a safe and reliable way to connect their valuable assets and products" commented Paul Chawla, Eurotech CEO. "We do not only accelerate and simplify IoT connectivity and Edge AI enablement in mission-critical applications, but we do it in a cybersecure manner in compliance with the highest standards that the market requests".

"Compliance with the recognized industry cybersecurity standard IEC 62443-4 is a critical milestone for our Edge product portfolio. With our integrated solutions in place, our partners, system integrators and customers can rely on an open, yet secure foundation to develop and deploy their applications" stated Marco Carrer, Eurotech CTO. "We provide trusted and certified hardware with integrated software necessary to accelerate the deployment of secure Industry 4.0 applications".
