

PRESS RELEASE

EUROTECH JOINS THE E4S ALLIANCE TO ADVANCE OPEN EDGE COMPUTING STANDARDS FOR SMART SECONDARY SUBSTATIONS

Amaro (Udine), Italy, July 28, 2026 - Eurotech today announced it has joined the Edge for Smart Secondary Substations (E4S) Alliance as an Executive Member. E4S is a DSO-led international initiative created to develop a standard, flexible, manageable, and interoperable edge computing platform for next-generation smart grids. By bringing together the largest distribution system operators in Europe with technology providers, E4S aims to digitize the grid, reduce total cost of ownership, and accelerate the deployment of new applications for the management and delivery of electricity.

Eurotech will contribute its expertise in European-designed edge AI and IoT hardware, IEC 62443-4-2 certified platforms, and open-source software as maintainer of Eclipse Kura and Eclipse Kapua, two leading projects of the Eclipse IoT ecosystem. Eurotech's participation reinforces its commitment to open standards, code sovereignty, and cybersecure solutions for critical infrastructure, in full alignment with E4S's mission to move the energy industry from proprietary silos toward open, interoperable architectures.

Eurotech joins ABB, Accenture, Advantech, Advanced Engineering Devices (AED), Analog Devices, Ariadna Instruments, Arin Technologies, Barbara, Capgemini, Zhejiang Chint Electrics Co., Consulting informático de Cantabria, Circutor, DELL, EA Technology, Elgama-Elektronika, ENEDIS, E-REDES, Eurotech, Eximprod Engineering, GE Vernova, Gridspertise, HEDNO, i-DE, Indra Soluciones Tecnologías de la Información (Minsait), Intel, Iskraemeco Technology, Kalkitech, Labalec-EDP, Landis+Gyr Olympus AG, Merytronic, Maschinenfabrik Reinhausen (MR), Nearby Computing, Ormazabel, PINAZO Talleres Electromecánicos, Plexigrid, S.A. de Construcciones Industriales, Sagemcom Energy & Telecom, Savoir-Faire Linux, Schneider Electric, Shenzhen Kaifa Technology (Chengdu) Co., Smilics Technologies, Tecnalía, Trialog, UFD, Unareti (A2A), UVAX MATCH, ZIV Automation.

About Eurotech

Eurotech is a multinational company that designs and develops edge computing platforms and systems, integrating hardware, software, AI, cybersecurity and services. Eurotech's solutions enable intelligent data processing close to operational infrastructures, supporting applications in industry, transportation, energy and other high-reliability environments. Eurotech collaborates with leading international technology partners, developing a global ecosystem for the implementation of integrated Edge AI and Internet of Things (IoT) projects and solutions. www.eurotech.com

About E4S Alliance

The Edge for Smart Secondary Substations (E4S) Alliance is an international non-profit association (AISBL) incorporated under Belgian law and based in Brussels. Its mission is to promote the specification, development, certification, and adoption of a standards-based, open, secure, and interoperable edge computing platform for secondary substations on electric distribution grids.
