

FROM THE EDITOR'S DESK

*Industrial technology is entering a period where “what works today” is no longer enough. The real question is: **will it still work tomorrow?***

*From changing regulations and digital sovereignty to software transparency and component availability, organizations are being pushed to think further ahead — and to have greater control over the technology they deploy. **SBOMs, cybersecurity, open architectures and lifecycle planning are becoming essential parts of that conversation.***

*That perspective runs through this edition: from **transportation and mobility** to recent **recognition by BAE Systems and PAC**, and the pressures shaping the hardware market. We also revisit September's events and share what's coming next.*

So, what's been on our radar lately? Here are a few highlights.

— The Eurotech Editorial Team

TRANSPORTATION & MOBILITY · PRODUCT ANNOUNCEMENT

High-performance computing for intelligent railway operations

Eurotech introduces **BoltCOR 45-10**, a compact, fanless and ventless edge server **designed for demanding railway environments**. Powered by Intel® Core™ Ultra Series 3 processors, it combines **high-performance computing, secure data processing and flexible connectivity** for AI, vision, condition monitoring, predictive maintenance and fleet management.

Its **scalable and modular architecture** also supports demanding **applications beyond rail, including off-road, mining and construction**, and all environments where compactness, fanless operation, high performance and ruggedization against temperature and vibration are essential.

DEFENSE & SUPPLY CHAIN EXCELLENCE · PARTNER SPOTLIGHT

BAE Systems Honors Eurotech with a Gold Tier Recognition

“This award underscores our shared commitment with BAE Systems to transforming technology into value: delivering innovation that meets real-world challenges with reliability and performance.”

— Massimo Milan, CEO, Eurotech

OPEN SOURCE, DIGITAL SOVEREIGNTY · INDUSTRY RECOGNITION

Eurotech Named a Top Contributor in PAC's 2025 IoT & Edge Computing Vendor Landscape

Analyst firm PAC (Pierre Audoin Consultants) has named Eurotech a Top Contributor to **open-source IoT and edge computing**, citing its **active role in the Eclipse Foundation** — including its status as a **founding member of the Eclipse IoT Working Group** and **key contributor to the Eclipse Kura and Eclipse Kapua frameworks**.

SUPPLY CHAIN UPDATE · NAVIGATING THE CURRENT LANDSCAPE

Preparing for a more constrained hardware market

If you're planning an industrial deployment today, it's worth looking beyond the specification sheet. **Component costs are shifting, lead times are less predictable, and some processors, memory and SSDs are becoming harder to secure.** At the same time, **new cybersecurity requirements** are changing what needs to be considered throughout a product's lifecycle.

For industrial projects, it is therefore **important to consider not only which hardware fits the application, but also availability and securing future demand.**

These pressures are affecting the wider market so there is no single solution.

But understanding your requirements early gives you more options when conditions change.

EVENTS · WHERE WE WERE THIS MONTH

InnoTrans 2026**SEP 22-25**

Berlin, Germany Hall 4.1, Booth #220

InnoTrans gave customers and partners the **opportunity to see the BoltCOR 45-10 firsthand**, exchange ideas and discuss the evolving needs of connected mobility. The conversations also highlighted how Eurotech can help turn these needs into **secure, high-performance edge computing solutions for real-world applications**.

The Things Conference**SEP 22-23**

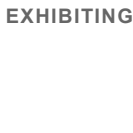

Amsterdam, Netherlands

Our **ReliaGATE 15A-14** made it to the IoT Wall of Fame!

In Amsterdam for The Things Conference 2026, our gateway joined **100+ devices** showcasing the **latest in Edge & IoT innovation**. As an **Eclipse Foundation member**, Eurotech is also part of the open-source ecosystem helping shape the technologies behind connected devices.

WHERE TO FIND US NEXT

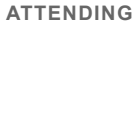

EXHIBITING

VISION

Oct 6–8 · Stuttgart, Germany · Messe Stuttgart · Hall 10, Stand 10G76

EdgeTech+ 2026

Nov 18–20 · Yokohama, Japan · Tokyo Big Sight · West Hall 4, Stand W27-30

ATTENDING

NVIDIA GTC

Oct 20–22 · Berlin, Germany · STATION-Berlin

Italian - Polish Defence & Dual Use Forum

Oct 28 · Warsaw, Poland · Verte Hotel

Enlit Europe

Nov 10–12 · Vienna, Austria · VIECON – Vienna Congress & Convention Center

Will you be there?

We'd be happy to meet.
